

## LITE & LITE MINI

High-quality electric office desk with an excellent price-to-quality ratio. Designed to meet modern ergonomic standards, it is ideal for those who work at a computer all day - whether in the office or a home office.

For added functionality, a cable hole can be positioned on the desktop, enabling convenient integration of power and network connections directly at the work surface.

LITE and LITE MINI desks feature dual motors integrated into both leg frames, ensuring fast, smooth, and quiet height adjustment. The desk height is easily adjustable via a user-friendly control button.

Drawer units on wheels, side cabinets, and other elements from the PIANO and SERIE product families complement PIANO desks perfectly. You can also enhance your LITE desk with front panels from the PIANO series as well as acoustic partitions from the SOFT or MUTEK collections.
